Venue /Activity Information

Venue / Event/ Activity name:	DLRA Speed Week 2021
Location of venue/event/ activity:	Lake Gairdner National Park
Date of event/activity:	Actual Event - 8 th March 2021 – 12 th March 2021 Occupation of site from 4 th March to 12 th March 2021
Duration of the activity:	Competition starts each day at 8.00am and finishes at 6.00pm Officials, entrants and spectators will be camping on site for the duration (24 hours)
Total venue/event/activity floor square metres:	260000 sq. m.
Total venue/event/activity publicly accessible floor square metres:	260000 sq. m.
Maximum number of attendees at capacity:	We anticipate up to 1200. This includes officials, entrants, and spectators
Requested maximum number of attendees for the venue/activity:	1200
Break down of room/area:	Competition Area – 200000 sq. m. DLRA Campground – 60000 sq. m.
Detail description of the activity:	<p>This is a Land Speed event for cars, trucks and motorcycles which takes place on a salt-lake in remote outback Australia. This is the 31st year we have held this event. There will be approximately 200 entrants and over the 5 days of competition it is anticipated that there may be up to 1000 spectators, some will be there for a day, others will stay the whole week. There is a designated pit area on the salt-lake and defined access roads from the edge of the lake to the pits and to the start lines. There are defined spectator viewing areas adjacent to the pits and at the start lines. Participants have 3 options for accommodation at the Mt. Ive Homestead (rooms and camping), at the DLRA camp (rooms and camping), and at the Mt. Ive camp (camping only)</p> <p>Within the competition area is spread over a very wide area, there are several of what I will call “activity hubs” where people are likely to gather in smaller groups. These activity hubs include: Lake Entry check-in, Entrant Registration, Technical Inspection, and Start Line.</p> <p>The number of participants at the event will vary greatly. In the lead up to the event (Thursday to Saturday) where event officials and entrants</p>

	<p>will be arriving and setting up for the event there will be less than 500 people. Most entrants will have arrived by the night before the event. When racing starts on the Monday and spectators are present will be the maximum number on-site. This will then decline as the week progresses and by the Friday there will be less than 300 people remaining.</p> <p>When we have the maximum number of participants at the event, we are planning on having a minimum of 6 COVID Marshalls on duty. There will be always at least one COVID-19 Marshal on duty per 200 attendees at all times. As the number of participants decreases, we will still post Marshals to cover all activity hubs during the event (lake entry, start line, pits and registration) and at the camps out of hours.</p> <p>All accredited Marshals whether they are on duty or not will still be responsible for observing and enforcing social distancing.</p> <p>Marshals will be wearing vests and/or a name card to identify them as a COVID-19 Marshal, this will passively make participants aware that they are being observed and Marshals will be instructing participants to socially distance where required.</p> <p>There will be regular messages / reminders broadcast by the announcer over the radio system for people to socially distance and observe good hygiene practices.</p> <p>Prior to the commencement of the event there will be a meeting of all the Marshals where they will be reminded of their powers, duties and responsibilities as defined in the COVID-19 Management Plan and described by the South Australian Department of Health.</p> <p>There will be a brief meeting at the start of each day of the event to discuss any issues that have arisen or are anticipated.</p> <p>A COVID marshal register will be maintained containing the full name of the marshals; the start and finish time of their duty at the event/venue; and the location within the event/venue which will be their responsibility. The register will be available during the event for inspection on request by an authorised officer as defined in the Emergency Management (Public Activities) (COVID-19) Direction 2020.</p> <p>This will be available for viewing at the Registration Van in the pits.</p> <p>There will be 26 entrants from Victoria competing at the event and 12 officials. If the day 1, 5 and 12 testing is still in place when Speed Week is on, to save these individuals from having to travel back to Port Augusta for testing, our Chief Medical Officer has arranged for day 5 tests to be conducted at the lake and all these Victorians have been advised that they will have to isolate until test results are returned. The Chief Medical Officer has arranged for Wrights Air who will be conducting joy flights from the salt to take the test samples to Port Augusta for testing and has arranged for Port Augusta Hospital to notify him of results via satellite phone.</p>
--	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Section 2: Application of Density and Distancing principles to all accessible areas

Your COVID Management Plan must apply the following infection control principles for both staff/volunteers and patrons/attendees:

- > **Density:** The maximum number of members of the public in any single room or enclosed area must not exceed 1 person per 2 square metres.
- > **Distancing:** Endeavour to ensure individuals and social groups maintain a distance of 1.5 metres apart.

Accessible areas include the following:

Functional space	Examples
Publicly accessible areas	Competition area on lake, camping areas, dining areas, bar access areas, public toilets, entry and exit points.
Shared external facilities including accessing transportation	Car parking for officials and volunteers, entrants and crew, and members of the public.

Please outline below how you will manage people density and social distancing during your activity.

2.1 Publicly accessible areas

- How will you ensure each rooms' capacity is not exceeded including restroom/toilets?
- How will you monitor the number of patrons at any given time?
- How will distancing be managed in all spaces e.g. Bar, restrooms, public food service areas?
- How will distancing be managed between groups on a dance floor?
- How will you identify and separate social groups?
- How will you manage the number of people using vertical transport e.g. lifts, escalators?
- How will distancing be managed pre-entry and on exit e.g. line-ups, street congregations?

Density:

Public Area Capacity

- Competition Area - is all outside (no rooms), portable toilets are all single use. People will queue outside observing distancing requirements. As there are no hard floors, and we are not permitted to mark the salt, traffic cones will be used to define appropriate social distancing.
- DLRA Campground – ablution blocks (15 sq. m) will be restricted to 7 people at any time. People will queue outside observing distancing requirements. As there are no hard floors, traffic cones will be used to define appropriate social distancing.
- Canteen – the canteen has an outside dining area of 120 sq.m. with a maximum of 60 people permitted in this area at any one time. There is an inside dining area of 98 sq. m. with a maximum of 49 people permitted in this are at any one time.
COVID Marshalls will be counting people in and out of these areas to ensure maximum capacity is not exceeded.
- We will abide by the density requirement of the Emergency Management Direction that is current at the time (e.g. 1 person per 2 square metres or 1 person per 4 square metres).

Public area numbers

- Prior to the event we will know numbers based upon those that have pre-entered and on-line.
- Competition Area – All participants to be processed at Lake Entry. Entrants and crew register in the pits.
- DLRA Campground – All participants to be processed at Lake Entry.

Public Area spaces

- Competition Area – Officials, volunteers and vendors will be observing that participants are adhering to distancing regulations.
- DLRA Campground – Campground Manager will be observing that participants are adhering to distancing regulations.

Distancing:

- To reduce the opportunity for crowding, the vehicle technical inspections will be done in each entrant's pit rather than at a central location.
- To reduce the opportunity for crowding the Pre-Stage queue for the start line will be 2 groups of 10. We are no permitted to mark the salt surface so there will be a 3 metre x 2 metre blue tarpaulin to define appropriate social distancing marks for each vehicle. Entrants will nominate when they are ready and remain in their pit. Then they be called up via the UHF radio by the Pre-Stage Marshall.
- COVID-19 distancing signs will be placed around each activity hubs to remind participants.
Traffic cones will be placed 1.5 metres apart as an indicator of appropriate social distancing at all queues. There will be no queues inside the canteen, all queues will be on dirt or salt.
- Where participants cannot distance appropriately a mask must be worn.
- By their nature most participants (competitors or spectators) form natural groups or social gatherings. Many participants travel together, work or spectate together and camp together. Participants will be encouraged to stay in their own groups by the use of media (program, public radio system) and the observations and directions of the COVID Marshalls.

Social Groups

- Competition Area - Track restricted to officials and entrants only, there is no segregation of participants (Entrants, Officials, Volunteers, Spectators) to any other areas.
- Each entrant's pit is approximately 4 metres by 6 metres and they will be separated by a space of 2 metres. Distancing signs will be placed at the entrance to the pits and around the pit area.
- DLRA Campground – No segregation of participants, definition of or booking of sites (we are not permitted to install stakes or pegs in the ground), there are no social groups, participants choose where they will set up their camp, observing all social distancing requirements.
- Campers will be directed to leave a space of at least 2 metres between each camp. Distancing signs will be placed at the entrance and around the campground.
- COVID Marshals will patrol all areas and will direct participants to appropriately distance. There will be advice provided about this in the event program and reminder announcements broadcast over the public radio system.

Vertical Transport

- There are no lifts or escalators.

Pre-entry line-ups

- Competition Area – Participants will be queuing in vehicles to enter and exit the lake.
- DLRA Campground – There will not be any queues where people will be standing other than for toilets. As there are no hard floors, traffic cones will be used to define appropriate social distancing.

2.2 Staff facilities and service areas

- How will you protect your staff and volunteers from the potential transmission of COVID-19?
- How will you ensure each rooms' capacity is not exceeded including restroom/toilets?

Density:

- During competition, each area where officials will be stationed is a hub or focal point for entrants, by design these areas are already low-density areas.
- Where there was previously meetings or large gatherings (Drivers Briefing) will be conducted by officials over the UHF radio.
- Where officials are required to speak to entrants individually such as registration there will be structured queues. As there are no hard floors, traffic cones will be used to define appropriate social distancing.
- There are 2 ablution blocks and 16 portable toilets. All toilets will display signage about washing of hands and social distancing. Any queues will be outside the toilets and defined by markers. As there are no hard floors, traffic cones will be used to define appropriate social distancing.

Distancing:

- Each area where officials will be stationed is an activity hub or focal point for entrants, each of these areas will display signage about washing of hands and social distancing. This includes lake entry, start line, registration van and technical inspection. Other areas where signage will be displayed is at the DLRA Camp and the Mt. Ive camp and the Canteen.
Marshals will be posted to each of these locations for the duration of activity at these locations and they will be advising participants to socially distance when they are not considered to be observing the correct guidelines.
- Where Officials and volunteers and entrants are required to meet face to face it will be optional to wear masks and provide clear plastic protective barriers. Eg. Lake Entry, Entrant Registration, start line, technical inspection.
- Signage about washing of hands and social distancing will be posted at all other appropriate locations.
- Soap and sanitizer will be made available at each hub.
- There will be a soap dispenser inside every toilet and sanitizer dispenser outside every toilet. There are three defined spectator areas, one at each of the start lines and the other next to the pits.
Each of the spectator areas are shown on the schematic maps. We have approximate dimensions that we use to set these areas out
1. Spectator Area in the pits (about 1,000 sq.m. but can be extended as required)

2. Spectator Area at Start Line 1 (about 300 sq.m. but can be extended as required)

3. Spectator Area at Start Line 2 (about 300 sq.m. but can be extended as required)

These are the only 3 areas where they can gather to watch the event.

Spectators can walk through the general pit area, but they are not permitted to gather at the Technical Inspection area in the pits.

Participants in the spectator areas will be subject to the same controls as anywhere else in the rest of the event area.

The spectator areas will have marshals dedicated to observe proper social distancing.

There is potential for some spectators to remain in their vehicles in the spectator parking areas, spectators will be advised by signage, notification in the program and announcements on the radio that they must park their vehicles 1.5 metres apart.

We will be using the density threshold of 1 person every 2 sq. m. if the Marshal considers that an area is becoming over crowded, they will have 2 options, first to ask people to leave the area or to increase the boundaries of the area to allow for appropriate distancing.

To their current specification, the spectator areas can, by the recommendations of the regulations, contain a maximum of 800 people. Given that there will be people in the pits and in the camps, this is considered adequate to comply with the regulations.

<p>2.3 Shared external facilities, including accessing transportation</p> <ul style="list-style-type: none"> For large events: How will you avoid crowding on transport to and from the events (including car parks)? How will you manage distancing in open areas such as lawned areas, lobby areas, designated smoking areas?
<p>Density:</p> <ul style="list-style-type: none"> There is no public transport to the event, it is all by personal vehicles There are large areas of dedicated spectator parking at the edge of the lake, next to the pits and at the start line. This is an outdoor event. Signage to be posted in all hubs reminding participants to socially distance and washing of hands
<p>Distancing:</p> <ul style="list-style-type: none"> Because there is no public transport, there is no need for public distancing Where there is potential for queues to form there will be defined barriers installed. As there are no hard floors, traffic cones will be used to define appropriate social distancing. All outdoor areas will be signposted about washing of hands and social distancing
<p>2.4 Other: <Venue Manager/Event Coordinator to specify></p>
<p>Density:</p>
<p>Distancing:</p>

Section 3: Process for contact tracing

Your COVID Management Plan must address the third infection control principle of contact tracing.

- > **Contact Tracing:** Contact tracing records must be gathered and retained for each patron/attendee in the event of a positive COVID-19 test result either by staff or patrons. Contact tracing must obtain a full name, contact number and/or email address.

Please outline below the process you put in place to ensure each patron/attendee provides their contact details to enable contact tracing.

3.1 Contact tracing

- Where will details be recorded?
- How will you ensure security and privacy of data?
- For specific activities, entry and exit times would be helpful for contact tracing. This will enable SA Health to locate people more quickly, rather than contact tracing all activity participants which will take longer.

Details:

- A Contact Tracing form is a mandatory part of the hardcopy Speed Week entry form. The entrant and all crew must include their details on the form. These Contact Tracing Records will be compiled into a book and available if required.
- Contract tracing details are a mandatory part of online ticketing and pre-booking for entrants and spectators. These Contact Tracing Records are compiled into a digital file and available if required.
- There is only one access point to the lake at what we call Lake Entry, on first arrival each participant is required to pay their lake entry fee and camping fee. At this time, they will also provide their contact tracing details onto a SA Health Contact Tracing Record form. These Contact Tracing Records will be compiled into a book and available if required.
- As a final method to capture all participants, there will also be a SA Health Contact Tracing Record forms at Registration in the pits, every person who presents at Registration will be asked if they have provided their Contact Tracing details and given the opportunity to provide them here. These Contact Tracing Records will be compiled into a book and available if required.
- After the event, all the Contact Tracing Record forms will be compiled into one book for easy access should they be required.

Privacy:

- Entry forms and online booking are processed by the DLRA secretary.
A hardcopy of all entry forms is held at registration.
Additional Contract Tracing forms will be used at Lake Entry to record those participants who have not pre-booked.
Access to this information will be restricted to the Clerk of Course, Secretary and Lake Entry Manager.
- Where possible entry and exit times will be recorded, but this is not an easy thing to do.

Entry and Exit Times:

- There is no opportunity for a mobile based visitor application due to the remote location and there being no mobile service or internet.
- Participants who pre-enter on-line will can provide details of the times/days they will be attending.
- We can request participants to indicate the length of their stay, as most will know this in advance.

Section 4: Application of Operational Control Standards

Your COVID Management Plan must address each of the following five Operational Control Standards.

Operational Control Standards	Requirement
Staff and patron health and wellbeing	Patrons/attendees and staff must actively declare that they are well and symptom free.
Hygiene and cleaning	Operators must minimise surface contamination, encourage personal hygiene, and use cleaning products that include detergent or disinfectant.
Public health education/information	Staff and patrons/attendees understand and are responsible for their personal distancing and hygiene practices, they are educated on the potential risks of certain behaviours and understand the event/venues COVID Management requirements.
Food and beverage service	Operators must take steps to minimise the risk of transmission in the preparation and serving of food and beverages. Operators must take steps to minimise the risk of transmission in the preparation and serving of food and beverages. They must also ensure that the consumption of food and beverages (Including alcohol) is served in compliance with the Emergency Management (Public Activities) (COVID-19) Direction.
Non-compliance and incident management	Operators must detail how they will deal with patron/attendee/staff non-compliance, and incidents that may occur during the course of business/the event.

The *Guidance for a COVID Management Plan* may assist in providing you with some potential solutions that may be appropriate.

Please outline below what measures you will take to implement these operational control measures.

4.1 Staff and patron health and wellbeing

- How will you gain staff and patrons declaration of wellbeing?
- Will each staff member and patron be questioned on arrival?
- How will you provide evidence of the health declaration?
- How will you ensure that sick staff stay home?

Details:

Declaration

- For Officials and volunteers, we will use the Contact Tracing Record Attendance Sheets
- For pre-booked entrants and spectators, they will have to supply contact tracing information as part of the application process.
- For entrants who have not pre-booked they will have to supply contact tracing information as part of the application process on the day.
- For spectators who have not pre-booked, they will use the Contact Tracing Record Attendance Sheets.

Verbal Confirmation

- Each person who is processed at Lake Entry will be questioned about their health and wellbeing as part of the orientation and induction process
- Each official and volunteer will be questioned about their health and wellbeing as part of their briefing before they commence their duties

Evidence

- Health declarations will be provided in hardcopy as Contact Tracing Record Attendance Sheets and in a compiled list for those that have booked online.

Sick Staff

- Officials and volunteers will be monitored during the course of their duties.
- Entrants, crew, and Spectators will be observed by Officials

4.2 Hygiene and cleaning

- What strategies will you use to minimise surface contamination? How often will high touch surfaces be cleaned?
- How will you encourage personal hygiene measures (e.g. cough etiquette, hand washing)?
- How will you ensure your cleaning materials/products to include detergent and/or disinfectant?
- Will cleaning be performed during opening hours?
- Please provide a copy of the cleaning schedule.

Touch Surfaces

- Portable Toilets will be emptied at least twice a day and touch points cleaned and sanitized hourly.
- Cleaning of touch points at activity hubs will be performed hourly or as required. There are very limited opportunities for touch points at Technical Inspection or Start Line.
- The touch points and clipboards at Lake Entry and at Registration will be sanitized after each person has used them.
- There is no mobile or internet, so contactless payment is not possible. Disposable gloves are to be worn by anyone handling cash.

Personal Hygiene

- All toilets will be equipped with soap and water.
- Sanitizer will be available outside of all toilets for people to use before entering and after leaving AFTER washing their hands.
- There will be hygiene signs placed in all toilets, at all hubs of activity, articles placed in the event program, verbal reminders at the lake entry orientation, and at any drivers' briefings.

- Hand sanitizer stations will be provided at all activity hubs

Cleaning Hours

- The event is open from 7.00 am until 7.00pm each day.
- There is every chance that cleaning will be performed during opening hours.
- Some cleaning will also be done after hours.

Cleaning Materials

- Detergent, disinfectant, and sanitizer have been purchased in bulk along with sufficient brushes, brooms, mops, and wipes for each area.

Cleaning Schedule

- We have a schedule of volunteers to perform regular cleaning. (<https://www.dlra.org.au.volunteers>)
- Instructions for cleaning will be displayed at each point. (See attached)

4.3 Public health education/information

- Will you display signage to communicate infection control messages to the public?
- What communication will be provided prior to, or upon entry for all patrons?
- How will you communicate the risks around certain behaviours (e.g. intimate personal behaviours, sharing drinks)?

Signage

- COVID-19 Awareness signs placed at all hubs of activity
- Hygiene signs placed at all high touch points.

Communication

- Details provided on the event page of the web site,
- Use our social media channels to alert and advise patrons of their responsibilities and need for compliance
- Articles will be placed in the event program,
- Verbal reminders at the lake entry orientation,

Communicate Risks

- This will be part of the signage we display at activity hubs and the messages we give to patrons at orientations, inductions, and briefings.
- Reminders will also be broadcast by our announcer over the UHF radio system

4.4 Food and beverage service

- Are you compliant with the food safety standards?
- What infection control measures will you have in place regarding preparation and serving of food and beverages?
- How will you manage the flow of food and beverage service (e.g. queueing for food service)?

Food Safety Standards

- Pre-packaged alcohol will be available for sale and participants are permitted to bring alcohol to the event.
- Alcohol is strongly discouraged in the pits during competition hours.
- Alcohol will not be available for sale in the pits at any time.
- **Infection Control measures**
- Seating is provided in the dining area for patrons.
- Meals will be brought to seated patrons by catering staff.
- All meals will be served on disposable plates with disposable cutlery
- All touch areas in the dining area will be cleaned after each use.
- Food preparation areas are separate to dining areas
- There will be no communal food or beverage service areas.

- All beverages to be consumed at the canteen or taken away will be served in unopened pre-packaged containers.
- Additional Seating will be provided directly external to the canteen for food and beverages to be consumed

Food and Beverage Service

- There will be queues defined with traffic management poles and distancing signage to remind patrons. As there are no hard floors, traffic cones will be used to define appropriate social distancing.

For further information refer to the Catering Vendors Management Plan

4.5 Non-compliance and incident management

- What will your approach be in the event of:
 - Non-compliance with distancing.
 - Non-disclosure of contact tracing details.
 - Non-disclosure of symptoms.
 - A disturbance between patrons.
 - A health-related incident.
 - Exposure or suspected exposure to COVID -19.
- How will you make your non-compliance and incident management information publicly available?

Distancing non-compliance

- Patrons who are observed not properly distancing will be advised to please move.
- If patrons choose not to observe the distancing requirements, they will be ejected from the event venue.

Non-disclosure of Details

- Entrants and Crew or spectators pre-booking on-line will not be able to complete the booking process.
- Patrons who choose to not supply contract tracing details will be refused entry to the event venue.

Non-disclosure of Symptoms

- Patrons who are detected with symptoms and have not reported to the DLRA Chief Medical Officer will be ejected from the event venue.
- Anyone suspected of having COVID-19 will be required to leave the event immediately and will be advised to undergo testing as soon as possible.

Disturbance

- If there has been a disturbance and the parties involved have come into close contact, they will be required to leave the event.
- Any touch areas will be cleaned.

Health Related Incident

- Any incident where a patron has been suspected of having symptoms or of being COVID positive will be reported to the Port Augusta hospital

Non-Covid Health Related Incident

- The DLRA has a full Medical Team consisting of 2 highly trained and experienced doctors, 3 assistants, an ambulance, and a triage centre in the pit area. All of the medical team are trained in the proper use of PPE. We have a long-term relationship with the Royal Flying Doctor Service with our event and the location of our landing strip on their records in the event that an evacuation is necessary.

Exposure to COVID-19

- In the event of a patron being suspected of case, Officials and Medical personnel in close contact will automatically wear protective equipment (gloves and masks).
- The patron will be isolated.
There is no opportunity for testing at the event, so the patron will be forced to leave and report to the

nearest testing station (Port Augusta hospital) and then self-isolate.

Section 5: Supporting information

Please ensure you attach any supporting information that may be helpful to illustrate aspects of your COVID Management Plan.

This could include, but not be limited to:

- > Floor Plans
- > Photos
- > Existing and/or new COVID-Safe Plans
- > Liquor licensing plan – as in map of area covered
- > Cleaning schedule
- > Existing COVID Plan (if relevant)

Photos of Activity Hubs

Lake Entry – This is the entry point to the lake. Camping and Lake Entry fees are paid here. Pre-entries are checked, and event orientation and induction take place. Vehicles are also cleaned of dust as they come on and salt as they come off.

Registration – This is where the Clerk of the Course and the Event Secretary operate. Entrants come here to pick up their entry packs and get an individual entrant induction.

Technical Inspection areas – On the Saturday and Sunday prior to the event all vehicles are checked to ensure they comply with the DLRA rules and regulations.

Cars

Motorcycles

Start Line – This is where entrants line up to make their speed attempts down the track. There are 2 tracks.

Spectator Area – There are designated spectator areas, one next to the pits and one at each of the start lines.

Pits – Entrants are permitted to leave their competition vehicles on the salt for the duration of the event.

DLRA Camp – The majority of the temporary buildings are used to store equipment for Speed Week. Some huts are used for sleeping. The majority of people are in tents.
